

New VIAPLUS[®] 10000 LAJES

Elastic cementitious
Waterproofing coating.

Ultra-elasticity and
total protection
against sun and rain.

The newest addition to the Viapol family raises the standard in waterproofing. Developed with cutting-edge technology, it is the ultimate solution to prevent microcracks from compromising the finish, ensuring maximum durability even under direct exposure to UV rays and salt spray.

Ultra-elasticity
Elongation greater than 100%, moving with the structure without failing.

Total resistance
Withstands high water pressure and direct sun exposure (UV rays).

Versatility
Ideal for exposed slabs, gutters, large water tanks, and wet areas.

Reliable finish
Reliable finish Prevents cracks and substrate fissures from transferring to the final coating.

You dream it,
we build it
together.

VIAPLUS[®]

Waterproofs your project.
Protects your world.

VIAPLUS®

Product line

THE ORIGINAL
FOR YOUR PROJECT

VIAPLUS® 6000 FIBRAS

Flexible waterproofing coating with
synthetic fibers

BALCONIES DRYWALL WATER TANKS

WET & DAMP AREAS

- Allows direct tiling
- Flexible
- Easy application
- Does not affect water potability
- Withstands high hydrostatic pressure

VIAPLUS® 2000 FIBRAS

Semiflexible waterproofing coating
with synthetic fibers

WET & DAMP AREAS WATER TANKS

FOUNDATIONS AND FOOTINGS

FLOOR & WALL

- Allows direct tiling
- Withstands up to 60 mwc (meters of water column)
- Easy application
- Does not affect water potability
- Withstands high hydrostatic pressure

VIAPLUS® 7000 FIBRAS

Flexible waterproofing coating with
synthetic fibers

SWIMMING POOLS

DRYWALL

WATER TANKS

WET & DAMP AREAS

- Allows direct tiling
- High flexibility
- Easy application
- Does not affect water potability
- Withstands high hydrostatic pressure

VIAPLUS® 5000

Flexible waterproofing coating

GROUND-SUPPORTED TANK

ELEVATED TANK

- Does not affect water potability
- Withstands high hydrostatic pressure
- Accommodates structural movement and cracks
- Odorless
- Flexible
- Easy application
